## No Car Is **Quite Itself without** a Concrete Road

What makes a "crack" train? The roadbed as much as the rolling stock.

So with your automobile. Any car is a better car on a good road.

The car with the highest gas mileage has a higher mileage on Concrete.

The car with the quickest "pick-up" picks up quicker on firm, unyielding Concrete.

The best non-skid tire holds better on the gritty Concrete surface.

The car with the lowest depreciation has a lower depreciation on Concrete.

Motorists know these are facts—and motorists, if they insist, can get the kind of roads they want. Our Booklet R-3 tells other interesting things about Concrete roads. Write for your copy.
